

# NOVELTIES AT THE 79TH INTERNATIONAL GENEVA MOTOR SHOW 5. – 15. MARCH 2009

**Geneva Motor Show 2009 / exhibition hall 2, stand 2144**

Also this year, Carlsson exhibits its products at the most important automobile fair in Europe, the Geneva Motor Show. The world's leading automobile refiner from Merzig/Saarland will introduce three world premieres and its programme for Mercedes Benz and Smart in exhibition hall 2 at stand 2144.

## CARLSSON AIGNER CK65 RS BLANCHIMONT

Also in Geneva, Carlsson first shows the small series of the Carlsson Aigner CK65 RS Blanchimont which positions itself between the S-class and the Maybach. The edition is limited to 30 automobiles world-wide and stands out for its top exclusiveness and quality. The interior which has been developed in co-operation with the Etienne Aigner AG is equipped with precious materials: a fridge, electric tables, three monitor screens in the back, a Dolby-Surround system with 900 Watt for real cinema feeling as well as Carlsson Aigner glasses and a WLAN hotspot for world-wide internet access. The twelve-cylinder engine which has been modified by Carlson engineers delivers a performance of 705 hp. The elaborate two-colour varnish is available in 24 colour variations. The body kit has been created by the Carlsson head designer Rolf Schepp in the style of the Carlsson Design line.

## WORLD PREMIERE 1/5 UL: THE LIGHTEST 21" WHEEL IN THE WORLD

The five-spoke forged wheel has been developed in a weight-optimised way by Carlsson engineers in co-operation with the Carlsson head designer Rolf Schepp. In the size 21" the new Carlsson forged wheel only weighs 10.8 kg and is therefore the lightest wheel in the world. Carlsson is the only manufacturer in the world who consequently relies on forged technology and already introduces its seventh design line to the market.

## WORLD PREMIERE CARLSSON SMART LIMITED EDITION

The Carlsson Smart programme has been developed in 2008 and in Geneva, Carlsson presents a small series with an entire makeover for the first time. The exterior, interior, –Carlsson light alloy rims, leather seats and a special paint as well as many sportive accessories perfect the makeover. The Carlsson Smart limited edition is available in altogether 211 colour variations and can be equipped either with a petrol- or diesel engine. For the interior makeover, altogether 56 leather colours can be selected - therefore absolute individuality is ensured. The rear view is dominated by an elegant 4-pipe system and a sportive sound is guaranteed. Depending on the model, the performance is increased by up to 21 hp. The Carlsson Smart limited edition is available from 22,900 euros.

## REVOLUTION AT CARLSSON: WHEEL LINE 1/5 REVO IN BEST PRICE-PERFORMANCE RATIO

- ✓ World première in Genève
- ✓ REVOlutionary aggressive design line
- ✓ Matt black aluminium wheel
- ✓ Available in 8.5 x 19", 9.5 x 19", 8.5 x 20" and 10.5 x 20" for B- to S-class

Starting at 399,15 euros, this is a real commitment to a unique price-performance ratio. Not plainly conservative, but conspicuously provocative the new wheel line exhibits its double spokes with a rigid colour contrast in matt black and gloss-turned silver.

## RASCASSE – A STING IN THE TAIL

Carlsson, manufacturer of special cars based on Mercedes-Benz models, and high fashion leather goods manufacturer, Aigner, are proud to present their third unique limited edition model in the short space of one and a half years. The Carlsson Aigner® CK55 RS "Rascasse" completes the family, and is offered at a basic price of 228,500 euros. As with the first two automobiles designed by the Carlsson and Aigner team, the new model is also named after a legendary racetrack bend. But unlike the Eau Rouge and the Blanchimont, the Rascasse name does not originate from the racetrack Spa-Francorchamps. Rascasse is the second last bend of the Monaco Grand Prix Circuit as well as a famous street café located by the track. A perfect blend of performance, speed and breeding, the Carlsson Aigner Rascasse is also red, tasty, sporting, and carries a sting in its tail.
