THE NEW CARLSSON FORGED WHEEL 1/10 ULTRA LIGHT

With the 1/10 Ultra Light and its combination of five single and five double spokes Carlsson breaks new grounds. The different surface finishes render a discreet contrast. Behind the upper spokes and the outer rim in brushed aluminium lie the double spokes and rim well in a polished finish. Because there is no drop centre and the spokes are stretched over the outer rim, the 1/10 Ultra Light wheels in the sizes 19 and 20 inches render an especially dynamic character.

- For the first time, a light alloy wheel combines single and double spokes
- Elaborate forging process saves up to 40 percent weight
- With highest load capacity for a more agile driving behaviour
- Available in 19 and 20 inch
